

DIGITAL LITERACY PROJECT REPORT

Course Code: CSE0001

Course Title: Digital Literacy

Name: Saanvi Awasthi

Registration Number: 25BCE10478

Branch: B.Tech (CSE - Core)

University: VIT Bhopal University

Date of Submission: 25-03-2026

INTRODUCTION

This project was undertaken as part of the Digital Literacy course to develop essential digital skills required in today's technology-driven world. As a Student Digital Ambassador, the objective was to understand and demonstrate various aspects of digital literacy, including effective use of online tools, building a professional digital presence, practicing safe internet habits, and communicating responsibly in a digital environment.

The project consists of five tasks, each focusing on a different aspect of digital literacy. These tasks include creating an infographic, building a digital portfolio, exploring coding and collaboration platforms, drafting professional emails, and understanding cybercrime awareness.

All tasks have been organized and documented in a GitHub repository, which serves as a digital portfolio of my work and learning throughout this project.

TASK - 1

For this task, I created a digital literacy awareness infographic using Prezi and Canva. The infographic focuses on educating students about the importance of digital literacy in modern education. It includes key topics such as the meaning of digital literacy, useful digital tools, safe internet practices, maintaining a professional online presence, and email etiquette.

The Prezi presentation uses a zooming interface to make the content visually engaging and interactive, while the Canva design provides a structured and visually appealing layout. I included icons, short explanations, and examples to make the information easy to understand.

One interesting aspect of this task was learning how to present information visually instead of just writing text. It helped me understand the importance of design in communication. The challenging part was organizing the content effectively without making the infographic too crowded while still keeping it informative.

Overall, this task enhanced both my creativity and understanding of digital literacy concepts.

TASK – 2

In this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle. These platforms are essential for building a professional digital presence and showcasing skills.

GitHub is used for managing and sharing coding projects. I created my profile and maintained a professional README that highlights my interests and learning goals. LinkedIn is a professional networking platform where I updated my education details, including my degree at VIT Bhopal University. Kaggle is a platform for data science and machine learning practice, which will help me improve my analytical and problem-solving skills.

Over the next four years, I plan to use GitHub to upload projects, LinkedIn to connect with professionals and explore opportunities, and Kaggle to practice data science. These platforms will play a significant role in building my career and preparing for internships and placements.

TASK-3

In this task, I explored coding and collaboration platforms. For coding practice, I used HackerRank and successfully solved multiple beginner-level problems. This helped me improve my logical thinking and programming skills.

For collaboration, I created a Google Form titled "Digital Literacy Awareness Quiz" consisting of five questions. The form includes both multiple-choice and short-answer questions to assess understanding of digital literacy concepts. I also viewed responses through Google Sheets, which helped me understand how data collection and analysis work.

These platforms are highly beneficial for academic growth. HackerRank helps in improving coding skills and preparing for technical interviews, while Google Forms is useful for surveys, feedback collection, and data analysis in projects.

Overall, this task provided practical exposure to tools that are essential for both learning and collaboration in a digital environment.

TASK – 4

In this task, I learned the importance of professional communication through email writing. I drafted two emails: one requesting an assignment extension and another applying for a summer internship opportunity. Both emails were written using proper structure, including subject lines, greetings, clear body content, and professional sign-offs.

I also created a social media do's and don'ts checklist to promote responsible online behavior among students.

Poor digital communication can lead to misunderstandings and create a negative impression. For example, sending informal or unclear emails can be seen as unprofessional. This task helped me understand how proper tone, clarity, and structure can improve communication effectiveness in academic and professional settings.

TASK – 5

In this task, I studied phishing as a common type of cybercrime. I learned how attackers use fake emails and websites to trick users into revealing sensitive information such as passwords and bank details.

I was surprised to see how easily users can fall into such traps if they are not aware. Even simple messages can appear genuine and lead to serious consequences like financial loss or identity theft.

As a result of this learning, I will be more cautious while clicking links or sharing personal information online. I will always verify the authenticity of emails and websites before taking any action.

This task increased my awareness of cyber threats and the importance of staying safe in the digital world.

CONCLUSION

This project provided a comprehensive understanding of digital literacy and its importance in today's world. Through various tasks, I learned how to use digital tools effectively, build a professional online presence, communicate properly, and stay safe online.

The hands-on experience gained from platforms like GitHub, LinkedIn, HackerRank, and Google Forms helped me develop practical skills. I also became more aware of cyber threats and responsible online behaviour.

Overall, this project enhanced my technical knowledge, communication skills, and awareness, which will be beneficial for my academic and professional growth.
